

User Stories

Role	I want to	So that
Event Attendee	Receive a unique QR code upon registering for an event	I can access the venue without needing physical paper tickets
Event Attendee	Present and scan my QR code at entry points	I can check in quickly and avoid waiting in long queues
Event Attendee	Scan into specific sub-activities, workshops, or booths	I can track my participation and earn credit for sessions I attended
Event Attendee	View my attendance history across single or multi-day events	I can keep a personal record of my event schedule and attended sessions
Event Organizer	Issue unique QR codes automatically to pre-registered attendees	I can replace manual check-in lists with an automated verification process
Event Organizer	Use a scanning interface to verify attendees at entry points	I can cut check-in time per attendee and reduce administrative bottlenecks
Event Organizer	Set up check-in tracking for individual booths and workshops	I can gain insight into which specific sub-activities attendees actually engaged with
Event Organizer	Configure system workflows for single-day, multi-day, or multi-stop events	I can adapt the check-in process flexibly to different event formats
Event Organizer	View a live attendance dashboard during the event	I can monitor real-time entry data and attendee movement as it happens
Event Organizer	Generate accurate attendance reports after the event	I can prevent double-counting and eliminate missing records without manual counting
